

**You should vote against HB 161 because it's about
FREEDOM**

**FREE to manage my health my way. I use alternative therapies and cannabis is
the best one there is.**

**FREE to practice what I believe, not be forced to adhere to the belief systems
of others.**

**FREE from the risk of incarceration because I don't believe the same way
proponents of this bill do.**

And Because

**It is up to parents to teach their kids what they want their beliefs to be and it is
up to them to have an honest discussion about why they don't want them to
use whatever substance.**

**Statistics do show that in countries where people are not prosecuted for
cannabis use there is lower teen use.**

**Cannabis should be utilized in every aspect to bring back a local self sustaining
economy to Montana.**

**This is our state too and we have a right to stand up for what we believe and we
believe cannabis is good for Montana.**

**It is time to end the farce that prohibition is and we already have a good start
with industrial and medical cannabis.**

**Last but certainly not least there are far better things to use limited law
enforcement resources on. Pursuing prosecuting and incarcerating non violent
cannabis consumers is a waste of resources and an affront to the cause of
democracy.**

partnership for a THUG free America

**If you don't believe this could happen go to norml.org and search for Jonathon Magbie, patron
saint of unicorns to get the story of how this man was made paraplegic by a drunk driver at age 8,
was used as a poster child for MADD and was killed by our justice system at age 28 when he
was arrested on simple possession of cannabis, was incarcerated and died in custody from
inadequate health care.**
